When data is loading

Code

The screenshot shows a VS Code editor with a React application. The left sidebar contains a file explorer with a project structure including `src`, `App.js`, `App.css`, `index.js`, `package.json`, `README.md`, and `tailwind.config.js`. The main editor displays the `App.js` file, which is a functional component using `useState` and `useEffect` to fetch data from a REST client. The component renders a grid layout with a profile card and a list of items. The right sidebar shows the `App.css` file, which contains Tailwind CSS classes for styling the UI. The bottom status bar indicates that the application is running successfully.

```
1 import { useState, useEffect } from 'react';
2 import './App.css';
3
4 function App() {
5   const [data, setData] = useState(null);
6
7   useEffect(() => {
8     fetch('https://randomuser.me/api/?page=1&results=10&seed=abc')
9       .then(response => response.json())
10      .then(val => {
11        setData(val.results[0]);
12      })
13      .catch(error => {
14        console.error('Error while fetching the data: ', error);
15      });
16   }, []);
17
18   return (
19     <div className="App">
